

INVITED TALK

From Research to Real-World Applications: AI and NLP in Industry

Dr. Zar Zar Hlaing

AI & NLP Specialist

Dr. Zar Zar Hlaing is an AI and NLP Specialist based in Bangkok, Thailand. She holds a B.C.Sc. from the University of Computer Studies, Monywa, an M.C.Sc. from the University of Computer Studies, Mandalay, and a Ph.D. in Information Technology from King Mongkut's Institute of Technology Ladkrabang (KMITL), Thailand. Her research and professional interests include Artificial Intelligence (AI), Natural Language Processing (NLP), Neural Machine Translation (NMT), Large Language Models (LLMs), and multilingual language technologies. She currently works as an AI and NLP Specialist, developing and deploying production-ready AI and NLP solutions for enterprise AI applications. Her work focuses on transforming research into practical, scalable AI solutions that address real-world challenges.

ABSTRACT

Artificial Intelligence (AI) and Natural Language Processing (NLP) are transforming the way people communicate, work, and interact with technology. This talk explores how ideas developed through academic research can be translated into practical AI and NLP solutions for real-world applications. Drawing on selected NLP research works from my Ph.D. study, the session will highlight the challenges and lessons learned in developing language technologies for low-resource languages. It will then discuss the transition from academic research to industry, illustrating how research knowledge is translated into production-ready AI and NLP solutions. The talk will also provide an overview of current AI technologies, including Generative AI and Large Language Models (LLMs), and demonstrate how AI and NLP are creating value across diverse industries.

DATE

18 July 2026
(Saturday)

TIME

10:00 (Myanmar)
10:30 (Thailand)

CHAIRPERSON

Dr. Thazin Myint Oo
Senior Researcher, Language
Understanding Lab, Myanmar

This talk is open to LU Lab members only. Access details will be shared via the Lab Discord channel and email.
