

DR. SU MIE
(Formaly Prof. Mie Mie Su Thwin)

Ph.D. in Computer Science
ABNLP Certified Trainer
Cybersecurity Thought Leader

THE HUMAN ALGORITHM: CONSCIOUS REPROGRAMMING FOR RESEARCH EXCELLENCE

ABSTRACT

We live in two worlds: the world of **Digital Systems** and the world of the **Human Mind**. As researchers, we spend years mastering **Natural Language Processing** to teach machines how to understand data. But how much time do we spend understanding the "Source Code" of our own minds? We are thriving for advanced Artificial Intelligence, yet many researchers operate on outdated "internal software."

In this Seminar, Dr. Su Mie—a "Bridge Builder" with a Ph.D. in Computer Science and certification in Neuro-Linguistic Programming bridges the gap between **Computer Science logic or Machine Logic** and **Human Resilience or Human Emotional Intelligence**. Designed specifically for researchers, it translates abstract psychological concepts into actionable "System Updates" for the brain—helping students overcome Imposter Syndrome, burnout, and research anxiety.

LEARNING OBJECTIVES

By the end of this session, researchers will be able to:

- **System Debugging "Identify "System Bugs"**: Recognize limiting beliefs (e.g., "I am not smart enough") that act as malware in their thought process.
- **Execute "Internal Prompt Engineering"**: Use specific linguistic syntax to reprogram self-talk from anxiety to problem-solving.
- **Apply "State Optimization"**: Use physiological anchors to trigger focus and resilience instantly.

BRIEF BIOGRAPHY

Dr. Su Mie is a distinguished academic and transformation strategist who bridges the gap between Digital Systems and Human Potential. As the first-batch doctoral graduate from the University of Computer Studies, Yangon (UCSY) in 2004, she spent over two decades pioneering Myanmar's digital defense, including six years of service at the Myanmar Computer Emergency Response Team (mmCERT). A former Professor and Certified Ethical Hacker (CEH) Instructor, she led the Cybersecurity Research Lab and managed the Cyber Security & Digital Forensics Master's Program, mentoring a generation of Ph.D. and Master's students in malware analysis, digital forensics, and cybercrime investigation. Her expertise extends to cutting-edge technologies including AI, Quantum Computing, and Blockchain. Today, Dr. Su Mie has evolved her focus from "programming machines" to "reprogramming mindsets." As an ABNLP Certified Trainer of Neuro-Linguistic Programming (NLP) and a Business Leadership Coach, she applies her deep understanding of algorithms and systems thinking to human behavior.

Chairperson: Dr. Ye Kyaw Thu, LU Lab. Leader

10:00 to 11:30 (Myanmar Time), 22 Feb 2026
