

LU Talk (Oct)

Dr. Myo Myint Oo

Ph.D. (Computer Engineering), Prince of Songkhla University,
Hatyai (Campus), Thailand
Reviewer of IEEE Access Journal and Web of Science Researcher

Brief Bio:

Dr. Myo has got the B.C.Sc, (Hons), M.C.Sc degree from University of Computer Studies, Mandalay at Computer University (Lashio) Campus at 2011. His master degree thesis title is "Implementation of Lexical Analysis on Declaration Statement in C++ Programming Language". He has published this master results as international conference paper at ICSE 2011. He has joined the tutor at Computer University (Lashio). In 2012, he has passed the 9th batch of PhD (IT) at University of Computer Studies Yangon. His Ph.D (IT) research field is "Input Validation of Web Application Security". He has published one of his findings at the international conference paper at ICCA2016. In this year, he got the full scholarship from "Thailand Education and Health for ASEAN Countries". He has studied Ph.D.(Computer Engineering) at Prince of Songkhla University (Hatyai Campus), Thailand. He got his Ph.D (Computer Engineering) degree at within 4 years.

Theoretical Framework for Machine Learning Researcher

Abstract:

Machine Learning is a subset of Artificial Intelligence that enables computers to learn data patterns and make decisions without using programming. The goal of machine learning is to build algorithms that can automatically improve from data. There are four types machine learning, supervised learning, unsupervised learning, semi-supervised learning and reinforcement learning. All machine learning researchers need to learn math foundations such as Linear Algebra, Probability & Statistics, Calculus, Discrete Mathematic. Moreover, they must know the learning theory such as Bias-Variance Tradeoff, Loss function, Optimization, Generalization Theory, Regularization. Every algorithm can generate corresponding model and these models can evaluate by using different methods such as accuracy, precision and recall in classification, MSE, RMSE in regression. Moreover, in order to generate the optimal model, feature engineering and data preprocessing are the essential task of machine learning process. Finally, Research Methodology of ML in current and emerging trends of machine learning will be discussed for young researcher.

26 Oct 2025 (Sunday), Myanmar time: 10:00 am-11:00 am

Chairperson: Prof. Ye Kyaw Thu (Lab Leader)
